# NATIVE® 5 LIGHTWEIGHT

## C41PBK5\* C41PSBK5 C41SBK5 C41PPN5

The Native 5 Lightweight took all the enhancements that defined the fifth generation of this iconic design and supercharged them by packing them into an ultra-lightweight linerless FRN handle. Now the original PlainEdge™, black-handled version of the Native 5 Lightweight has company. All versions feature a full-flat-ground CPM® S35VN™ blade, a refined back-lock mechanism, high-traction Bi-Directional Texturing™, and an improved four-position clip that ensures fully ambidextrous carry and operation.

The pink Native 5 is a trustworthy cutting tool that also helps support a very worthy cause. A portion of all sales of this knife are donated to Guardians of the Ribbon, an extraordinary charity that provides direct support to women battling all forms of cancer. For more information, please visit [www.pinkfiretrucks.org](http://www.pinkfiretrucks.org).

# NATIVE 5 LIGHTWEIGHT BLACK BLADE

## C41PSBBK5

In addition to being one of our most popular everyday carry folders, the Native Lightweight has a long history of service with our nation's military personnel. To continue both those traditions and offer all the improvements of the Native 5 Lightweight in a low-profile format, we're proud to introduce a version with a CombinationEdge blade and non-reflective Diamond-Like Carbon (DLC) coating. The subdued blade is complemented by a matching black four-position clip for left or right-side tip-up or tip-down carry.

# MANIX™ 2 LIGHTWEIGHT BLACK BLADE

## C101PBBK2

The award-winning Manix 2 Lightweight redefined the standard in ultra-lightweight full-service folding knives. Tipping the scales at just three ounces but still offering a 3.37-inch blade and a high-strength Ball Bearing Lock™ mechanism, it remains the tool of choice when weight really matters. So what could possibly make it better? How about a discreet black Diamond-Like Carbon (DLC) coating to make the blade non-reflective? Match that with a black fiberglass-reinforced co-polymer handle and a black wire pocket clip that is reversible for left or right tip-up carry and you've got the ultimate lightweight, low-profile cutting tool.

# POSITRON™

## C195CFP

Brad Southard's new Positron takes the proven performance and dramatic styling of his best-selling flipper folder designs and distills them into a compact, pocket-friendly folder optimized for everyday carry. Although it proudly bears Spyderco's Trademark Round Hole, its full-flat-ground CPM® S30V® blade offers flipper-only one-handed operation. Its solid carbon fiber handle scales are contoured for comfort and house the nested, skeletonized stainless steel liners that are the heart of its sturdy LinerLock mechanism. Ball bearing washers guarantee an ultra-smooth opening action, while a reversible deep-pocket wire clip provides ambidextrous tip-up carry.

# BREND/ PIRELA MAMBA™

## C196CF TIP

A fusion of the talents of acclaimed custom knifemaker Walter Brend and knife designer Joel Pirela, the Brend/Pirela Mamba is an impressive fistful of tactical folder that operates with watch-like precision. The thick, skeletonized titanium liners that form the foundation of the handle also support its LinerLock mechanism. They are flanked by meticulously machined solid twill carbon fiber scales. The gracefully upswept CPM S30V blade faithfully replicates Brend's distinctive grind lines and highlights them with a dramatic two-toned finish of black titanium carbonitride (TiCN) coating on the bevels and a satin finish on the flats. Linking everything together is a butter-smooth flipper mechanism and ball-bearing-enhanced pivot for lightning-fast one-handed opening.

# BRADLEY FOLDER™ 2

## C134CFP2

Like Spyderco, custom knifemaker Gayle Bradley is passionate about making even the best things better. Building on the success of his immensely popular Bradley Folder design, his new Bradley Folder 2 is slimmer, lighter, and has more refined ergonomics than the original. All its core features, however, are still there in force, including a high-performance hollow-ground CPM M4 blade, full skeletonized stainless steel liners, a high-strength LinerLock mechanism, carbon fiber/G-10 laminate scales, and a four-position black hourglass clip that allows a full range of carry preferences.

# TIGHE STICK™

## C198TIP

Brian Tighe's custom-made folding knives are an impressive blend of sophisticated design and meticulous craftsmanship. His first collaboration with Spyderco faithfully captures the magic of his handmade knives and translates it into a truly exceptional factory folder. The Tighe Stick's dramatic upswept blade is saber-ground from premium CPM S90V® stainless steel and features a faceted tanto-style point. It is paired with an exquisitely sculpted handle made with solid titanium scales that provide the foundation for a high-strength Reeve Integral Lock (R.I.L.) mechanism. A reversible clip allows for left or right-side tip-down carry and, together with a prominent Trademark Round Hole in the blade, ensures instant access and swift, ambidextrous, one-handed deployment.

# MYRTLE™

## C194CFTIP

The Myrtle is an amazingly versatile folding knife that accurately reflects the refined style and craftsmanship of its designer, Belgian custom knifemaker Filip de Leeuw. Full-flat ground from CPM S30V stainless steel, its unique blade combines the workhorse performance of a broad, leaf-shaped profile with the enhanced utility of a slightly hooked point. The blade locks securely by means of a stout Reeve Integral Lock (R.I.L.) mechanism that is built into the handle's solid titanium scale. That scale is balanced by a skeletonized titanium liner, a titanium bolster, and a solid marbled carbon fiber scale on the front side of the handle. A wide hourglass clip, stonewashed to match the other handle components, ensures easy access and right-side tip-up carry.

# VRANGO™

## C201TIBLP

Michael Henningsson is an award-winning Swedish custom knifemaker who specializes in exquisitely crafted, extremely functional gentlemen's folders. A faithful expression of his custom style, the Vrangó features a uniquely shaped CPM S30V stainless steel blade that uses a deep hollow grind to yield an Americanized tanto-style tip and a slightly recurved primary edge. Its handle consists of a full-length backspacer, handle scales, and LinerLock mechanism, all machined from solid titanium and anodized a brilliant blue hue with a darker blue border. The scales are inlaid with carbon fiber inserts with a reversible tip-down stainless steel clip.

# SQUAREHEAD™

## C193TIP

Darriel Caston's lifelong fascination with small folding knives is clearly reflected in the Squarehead, an elegantly simple high-tech folder that offers performance far beyond its diminutive size. Its single-sided handle is machined from a solid piece of titanium and includes an integral LinerLock-style lock mechanism. The chisel-ground blade is machined from CPM S30V powder metallurgy stainless steel and, like the handle, features a matte stonewash finish. Amazingly small and lightweight, the Squarehead is clipless by design, but features a wide slot in the handle for easy attachment of a chain, fob, or lanyard.

# DOG TAG FOLDER™

## G-10/CARBON FIBER

## C188CFBBKP

Serge Panchenko's Dog Tag Folder provides an ideal platform for unique handle variations. The latest version of this popular design features a one-piece handle machined from durable and visually striking carbon fiber/G-10 laminate. Its single-beveled blade is chisel-ground from CPM S30V stainless and, along with the knife's other metal hardware, features a non-reflective black titanium carbonitride coating. An inlaid stainless steel spring in the handle provides tension for the detent mechanism, which keeps the blade fully opened or closed, but does not lock it.

# SPRINT RUNS

## Endura™ 4 and Delica™ 4 Lightweights with HAP40/SUS 410 Laminate Blades

HAP40 is a high-speed tool steel produced by the powder metallurgy process. Containing generous amounts of tungsten, molybdenum, vanadium, and cobalt, it possesses exceptional toughness and high abrasion resistance, making it an excellent candidate for blade steel. These unique limited-edition Sprint Run knives combine all the proven design features of our best-selling lightweight models with full-flat-ground laminated blades made with a central core of HAP40 flanked by layers of SUS 410 martensitic stainless steel. All the knives in Spyderco's HAP40 Sprint Run series feature distinctive burnt-orange-colored FRN handles.

# SPRIG™

## FB37GGRP

Based on custom knifemaker Phil Wilson's popular bird-and-trout design, the Sprig is an extremely versatile utility knife ideal for processing small game and fish. Its CPM S90V blade offers exceptional edge holding and corrosion resistance and features a full-flat grind and distal taper for friction-free cutting performance. Contoured forest green G-10 handle scales and Wilson's signature integral guard ensure a comfortable grip, while a custom-molded Boltaron® sheath with G-Clip™ attachment guarantees ease of carry and immediate access.

# ARK™

## FB35PBK

The ARK, or "Always Ready Knife™", is a small but potent personal-defense knife designed by John Shirley and Sam Owens. Its design was inspired by the need for forward-deployed U.S. soldiers to be able to defend themselves at all times—even while in the shower. To that end, the ARK's blade is machined from H-1® steel—a nitrogen-based alloy that is 100% rustproof. Its fiberglass-reinforced-nylon handle is molded directly onto the tang and features an ergonomic shape and Bi-Directional Texturing to ensure a secure grip, even with wet hands. A purpose-designed neck knife, it carries in an injection-molded polymer sheath that comes complete with a stainless steel neck chain. Exceptionally thin and lightweight, you'll hardly know the ARK is there—until you need it.

# PROFICIENT™

## FB36CFP

Designed by Chris Claycomb of Bushcraft UK, the Proficient is a high-tech expression of classic bushcraft knife design. Instead of traditional carbon steel and a Scandi grind, it features vanadium-rich CPM S90V stainless steel and a full-flat grind for superior cutting performance and edge retention. The scales of its full-tang handle are painstakingly machined from solid carbon fiber and thoughtfully contoured to ensure comfort during prolonged use. This state-of-the-art outdoor tool comes complete with a premium leather sheath for convenient, comfortable belt carry.

# STREET BEAT™ LIGHTWEIGHT

## FB15PBBK

The Street Beat Lightweight is a long-overdue fusion of Fred Perrin's compact Street Beat design and the cost-saving manufacturing efficiencies of his popular Street Bowie. The result is a remarkably lightweight, extremely concealable expression of the Street Beat with an injection-molded fiberglass-reinforced-nylon handle and black ceramic blade coating. True to the original design, it includes Perrin's distinctive index-finger groove that literally locks the user's hand to the handle when gripped firmly. Its injection-molded polymer sheath includes a reversible, angle-adjustable G-Clip attachment that can be configured to offer dozens of different carry positions.

# PARING KNIFE

## K05

The perfect tool for many kitchen cutting chores, the K05 Paring Knife offers an excellent balance of control and cutting performance. Its durable polypropylene handle is injection molded directly onto the blade tang and has a distinctive "stepped" texture pattern to ensure a secure grip. The MBS-26 stainless steel blade is ground exceptionally thin and meticulously heat treated for optimal edge retention. The black-handled K05 is available with either a PlainEdge or a SpyderEdge blade with a unique two-step serration pattern that protects the edge from dulling on cutting boards. The SpyderEdge version is also available with a red handle.

# SANTOKU

## K08PBK

Spyderco's original K08 Santoku was the first factory santoku introduced into the U.S. market. Straddling the line between a traditional Asian cleaver and a Western chef's knife, our current version of this traditional Japanese kitchen knife is crafted from premium MBS-26 stainless steel and ground extremely thin for low-friction cutting performance. Its "stepped" black polypropylene handle provides a comfortable, secure grip and is injection molded directly onto the tang of the blade for strength. If you're a serious chef, you owe it to yourself to give the Santoku a try. You'll wonder how you ever got along without one.

# MINI PARING KNIFE

## K09PBK

For detailed kitchen cutting tasks, nothing beats the K09 Mini Paring Knife. The straight cutting edge and acute point of its 2.25-inch blade make it the tool of choice for paring, carving decorative garnishes, and other food preparation chores that require precise control. Its full-flat-ground MBS-26 stainless steel blade is ground exceptionally thin and paired with a durable black polypropylene handle. The handle's generous size and distinctive "stepped" texture pattern ensure a positive grip and both comfort and control during use.

# RAVEN™ 2

## BY08GP2

Nevermore? For the versatile byrd Raven, fortunately not. Back and better than ever, the new Raven 2 features an upgrade to CTS™ BD1 blade steel, a low-friction full-flat grind, and a newly designed four-position hourglass clip with a broad, sturdy base. The full skeletonized stainless steel liners and textured G-10 scales also have a more generous relief cut to allow easier operation of the high-strength LinerLock mechanism.

# CROW™ 2

## BY09GP2

The Crow 2 takes the handy, pocket-friendly design of the first-generation Crow and updates it with a full-flat-ground CTS BD1 blade and a more robust clip design that now offers both left and right-side tip-up carry. Built on a framework of full skeletonized stainless steel liners and textured G-10 scales, its improved handle design also includes an enlarged relief cut to make operation of the sturdy LinerLock mechanism even easier.

# CARA CARA™ 2 TITANIUM

## BY03TIP2

byrd knives have always excelled at providing high performance at affordably low prices. That standard takes on new meaning with the new titanium-handled Cara Cara 2, which combines all the proven features and functionality of this popular design with a premium handle made with solid titanium scales. Precision machined and sporting a handsome matte finish, the titanium scales are paired with a full-flat-ground PlainEdge blade, a sturdy back lock mechanism, and a four-position hourglass clip that offers all possible carry preferences.

# MEADOWLARK™ 2 TITANIUM

## BY04TIP2

Prized for its light weight and extreme strength, titanium is considered by many to be the ultimate knife handle material. Based on that standard, the new Meadowlark 2 may very well be the ultimate expression of this best-selling model. Its time-tested full-flat-ground blade, ambidextrous back lock mechanism, and versatile four-position clip are all paired with a handle featuring precision-machined solid titanium scales—all at a suggested retail price less than \$100.

# CARA CARA™ 2 STAINLESS BLACK

## BY03BKPS2

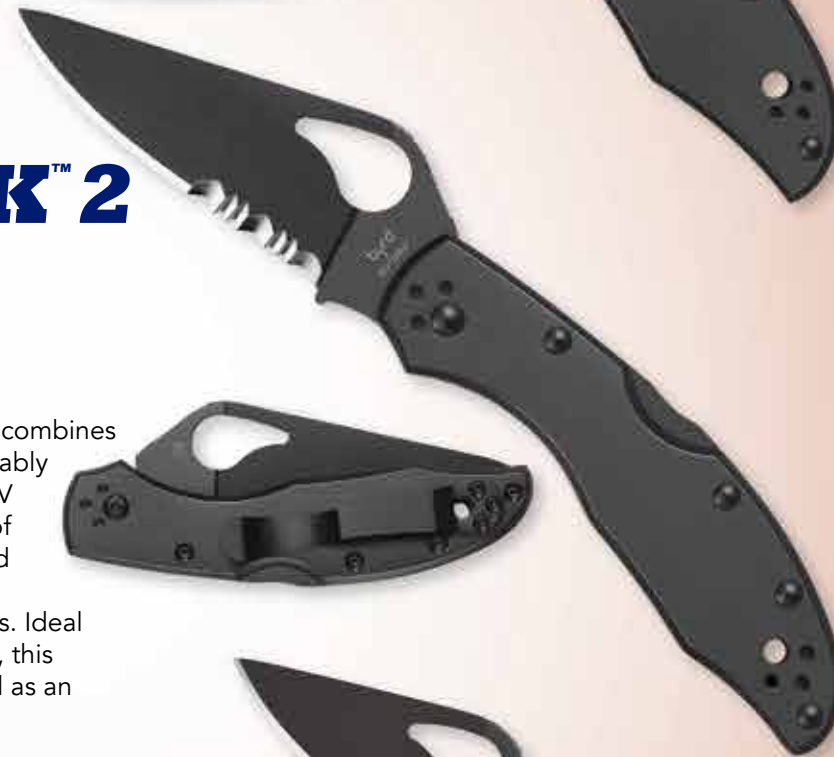

The Cara Cara 2 has long been a favorite of savvy knife users looking for maximum performance at a budget-friendly price. Back by popular demand, the all-black version of this best-selling knife offers screw-together construction and a low-profile black oxide coating on both the blade and the stainless steel handle. Available with a versatile CombinationEdge, it offers powerhouse cutting performance on fibrous materials as well as the control and precision of the non-serrated section of the blade.

# MEADOWLARK™ 2 STAINLESS BLACK

## BY04BKPS2

The stainless-steel-handled version of the Meadowlark 2 combines the heft and strength of an all-steel handle with a remarkably capable CombinationEdge blade ground from 8Cr13MoV steel. We are proud to reintroduce the all-black version of this knife, which features screw-together construction and a handsome black oxide coating on the handle, blade, four-position pocket clip, and all other metal components. Ideal for environments requiring subdued, non-reflective tools, this expression of the Meadowlark 2 would serve equally well as an everyday carry knife.

# ROBIN™ 2 STAINLESS BLACK

## BY10BKP2

The all-new, all-black Robin 2 is an impressive synergy of low profile and high performance. Its robust stainless steel handle features screw-together construction and is paired with a full-flat-ground PlainEdge blade. The blade, handle, four-position hourglass clip, and all other hardware sport a discreet black oxide coating that keeps this attractive knife "under the radar" until duty calls. Despite its compact size, strategically placed jimping (textured grooves) on the thumb ramp and index-finger choil ensure a secure, hand-filling grip.
