

# SPRINT RUNS!

2005 saw Spyderco arrive at a milestone, topping a hundred different models in our company's history. Many of our early model knives are no longer manufactured, but that doesn't stop knife enthusiasts and collectors from asking, "please make them again?" Their requests provide reason and opportunity to produce Sprint Runs. Sprints are limited to 1500 pieces or less. They're re-released production runs of a revitalized older model, or they create an experimental opportunity for us to use new and innovative materials on popular existing knife designs. Once a Sprint Run sells out it will not be offered again to maintain uniqueness.

**The Spyderco Dyad** is the only knife Spyderco makes with both a PlainEdge and a SpyderEdge blade together in the same knife. Traditional jugged bone handle houses a PlainEdge Clip-point blade and a Spyder-Edge Sheepfoot blade. Blades open and lock independently. Clipless.

## C112 MICRO DYAD

### Model

C112P&S Micro Dyad

### Closed

2-15/16" 63mm

### Overall

With one blade opened:

4-7/16" 113mm

### Edge

2-7/8" 73mm

### Blade Steel

ZDP-189

### Weight

2.6oz 76g

### Edge Types

PE

### Almite Chinese

#### Folder, Knifemaker Bob

Lum's Chinese Folder crosses a centuries-old Asian-style blade with modern materials. Blade is leaf-shaped, with a broad and flat-ground edge. Aluminum handle coated in wear-resistant Almite. Nested LinerLock with self-adjusting pivot.

Ten years ago the **Military Model** was a break-out design for Spyderco, kicking off a public obsession with high performance, high-end folders. Its track record makes it the ideal experimental canvas to try new handle and blade materials. A limited run of carbon fiber handled Millies are being offered with BG-42 blades. Right hand, PlainEdge only.
