C92 KOPA

Limited to 600 pieces of each handle material, our ongoing Kopa Series launched in 2005 enters 2006 with its fifth, through seventh installments. Kopa knives have stainless handles individually fitted with exotic inlays. The handles are bioengineered, fitting the hand with expansion points keeping the palm in perpetual contact for precise cutting and safety. Utilitarian and stylish, the leaf shaped blades have a spine cusp, mid-positioned back-lock and silhouette steel pocket clip.

- ▶ Flat-ground blade
- ▶ David Boye Dent
- ▶ Right hand tip-down carry
